Address: Gothenburg, Sweden

PROFILE SNAPSHOT

Senior Front-end Engineer with 6+ years of experience in building scalable web applications, reusable component libraries, and robust UI frameworks. Proven expertise in React.js, React Native, TypeScript, and Material-UI (MUI), with a strong focus on Design Systems, theming, and cross-platform component architecture. A collaborative technical leader passionate about driving front-end innovation, code quality, and design consistency across platforms. Seeking to leverage deep expertise in UI development and system-level thinking in a Senior Front-end Developer – UI Framework role.

AREAS OF EXPERTISE

Languages: JavaScript, TypeScript, SQL, HTML, CSS, GraphQL

Front-end Frameworks: React.js, React Native, Vue.js, Next.js, AngularJS, .NET

Libraries & Tools: Material-UI (MUI), Ant Design, Tailwind CSS, Bootstrap, Storybook, Figma, Adobe Experience Manager (AEM)

State Management: Redux, Redux Toolkit, Context API

Backend & APIs: Node.js, Express.js, RESTful APIs, GraphQL, JWT, OAuth

Databases: MongoDB, MySQL, PostgreSQL, Mongoose

Testing & QA: Jest, Cypress, Unit & Integration Testing, React Testing Library

DevOps & CI/CD: AWS, GitHub Actions, Jenkins, GitLab, Bitbucket

Tools & Concepts: Micro-frontend Architecture, Responsive Design, Accessibility, Agile/Scrum, Jira, Git, Functional Programming, Theming, Design Systems

CAREER HISTORY

Apr 2025 – Present **Software Engineer** | Skillur, Gothenburg, Sweden

June 2024 – Jan 2025 **Sr. Software Engineer** | Zensar Technologies, India

May 2022 – June 2024 **Software Engineer** | Laminaar Aviation Infotech, Bangalore, India

June 2019 – May 2022 **Sr. Software Engineer** | Mindtree Ltd, Bangalore, India

PROJECT CONTRIBUTIONS

@Skillur, Sweden | Apr 2025 – Present

Develop and maintain high-performance, scalable web applications using React.js, Node.js, and Tailwind CSS, deployed on AWS. Focus on clean architecture, responsive UIs, and cloud-native scalability in an Agile environment.

Key activities performed:

- Built modular, reusable React components with a focus on performance and accessibility.
- Developed RESTful APIs using Node.js and Express.js, integrated with SQL databases.
- Collaborated in cross-functional teams using Agile practices, such as sprint planning, stand-ups, and retrospectives.
- Conducted code reviews, performance tuning, and debugging to ensure high code quality.
- Deployed and maintained cloud-based applications on AWS, optimizing for scalability and reliability.

@Zensar Technologies, India | June 2024 – Feb 2025

Led front-end development using Vue.js and Adobe Experience Manager (AEM) to deliver dynamic, content-rich web experiences.

Key activities performed:

- Designed and developed reusable Vue.js components for modular, scalable UIs.
- Integrated Vue.js with AEM for seamless content management and dynamic rendering.
- Ensured cross-browser compatibility, responsiveness, and WCAG compliance.
- Wrote comprehensive unit tests (Jest) to ensure code stability and prevent regressions.
- Collaborated with backend teams to consume and display data via REST APIs.

@Laminaar Aviation Infotech, India | May 2022 – June 2024

Full-stack developer focused on high-performance applications using Next.js (SSR), .NET, Node.js, and cloud platforms.

Key activities performed:

- Built server-side rendered (SSR) applications using Next.js, improving SEO and load performance.
- Developed backend services with .NET and Node.js/Express, handling business logic and API integrations.
- Integrated REST and GraphQL APIs, optimized data fetching, and improved backend efficiency.
- Designed database schemas in MongoDB and MySQL, implemented indexing, and caching strategies.
- Implemented JWT and OAuth for secure authentication and role-based access control.
- Created a custom UI component library (arms_v.2.8_webui) with MUI, dynamic forms, and Gantt charts.
- Automated CI/CD pipelines using Azure DevOps and GitHub Actions.
- Deployed and managed applications on Azure, optimizing for cost and scalability.

@Mindtree, India | Jun 2019 – May 2022

Project – Console Cloud

Front-end developer on Console Cloud, a cloud-based property management platform. Played a key role in migrating from Angular to React and introducing React Native for cross-platform capabilities.

Key activities performed:

- Led the migration of frontend from Angular to React.js using TypeScript and functional components, improving performance and maintainability.
- Developed and maintained React Native modules for mobile access to property management features, enabling cross-platform consistency.
- Built reusable, responsive UI components using React, Bootstrap, and MUI, ensuring design uniformity.
- Integrated Redux and Redux Toolkit for efficient state management across complex workflows.
- Collaborated with UX designers to implement a theming system using CSS-in-JS and MUI customization, supporting brand consistency.
- Designed custom hooks and higher-order components to promote reusability and reduce code duplication.
- Authored technical documentation and conducted knowledge-sharing sessions for new team members.
- Implemented authentication using JWT and OAuth, and tested APIs via Postman.
- Wrote unit and integration tests (Jest) to ensure reliability and prevent regressions.
- Deployed applications on AWS and Vercel, ensuring high availability and fast load times.

SCHOLASTIC & ACCREDITATION

2019 Bachelor of Technology in Electronics & Communication Engineering

Sathyabama Institute of Science and Technology, India

Key Accolades

- Spearheaded the development of core modules and reusable components for enterprise applications.
- Designed and published a custom UI component library used across multiple products.
- Led external integrations and client-facing requirement gathering sessions.
- Recognized for creative problem-solving and deep understanding of full-stack architecture.
- Expertise in Design System principles, theming, and cross-platform UI consistency.
- Strong advocate for code quality, accessibility, and performance optimization.
- Skilled in technical documentation, mentorship, and cross-functional collaboration.

Motivation

As a passionate front-end engineer, I thrive on building elegant, scalable UI frameworks that empower development teams and elevate user experiences. I am excited to bring my expertise in React, React Native, MUI, and Design Systems to a forward-thinking team in Sweden. Eager to adapt to new work cultures, contribute to innovation, and grow as a technical leader in the automotive or adjacent tech space.
